Hi (b) (6),

Currently GSA R4 is dealing with the following IAQ/Mold issues for immediate abatement.

NC0111AB Terry Sanford	310 NEW BERN AVE RALEIGH, NC 27601	(b) (5), (b) (6)
FL0064AE. R L TIMBERLAKE JR FB	500 E ZACK ST TAMPA, FL 33602	
TN0088ZZ CLIFFORD DAVIS-ODELL HORTON	FEDERAL BUILDING MEMPHIS, TN 38103	

At this time we currently don't have any immediate Asbestos (ACM) health exposure which would require abatement. The GSA owned portfolio does have older buildings that contain ACM material.

Thanks for your support.

*Please excuse any typos; sometimes our good intentions are trumped by auto correct and spell check.*

We only have one issue in Region 6 and it is in a decommissioned building, but materials had been stored in the building:  
Federal Records Center Building 100 Generator Building, MO0551AG, 9700 Page Boulevard, Overland, MO - Asbestos

Please contact me for additional information.

Thank you.

As part of our due diligence on this task we have checked IRIS work items, NCMMS and JIRA work tickets, our Project Tracker system and the NCR Asbestos Abatement Permit log.
